I wasn't sure what to think when I first got this cd, as drums aren't really my thing.

With that said though, you all know me, I will review anything off the fringes and different.

For a while I put off listening to this cd and fretted about what kind of review I could write.

I have heard a lot of drum music, music that people thought so inspirational, so moving and to me, it was just drums...and boring ones at that.

But I finally bit the bullet and had a listen and was pleasantly surprised.

Powerful, moving and truly ear catching, this cd will have you swaying, tapping and nodding...and maybe all three at once.

I won't say this music is, "inspirational," because that is a term I use for religion only, but let me just say that from the opening of Dancing the Dragon to Pagan Soldier, you will be

treated to a variety of sounds and many, many beats.

It's not easy to keep from head bobbing as you listen and I'm sure I got lots of strange looks as I drove down the road, but that is just me. If I can feel music, I move to it...and this I could feel.

I enjoyed this cd and think these guys have more than a bright future ahead of them...breaking out of the mold from their counterparts as neither boring nor sleep inducing...but bold and moving in a new direction.

I give this cd a 7 out of a Twisted 10 and recommend it if you like drums and power that you don't get with many other, so called, "drum bands."
